Timeline

When do you need to make decisions by? When do tasks need to be done by to make sure you submit on time? (Aim to submit BEFORE the deadline to allow for unforeseen circumstances).

On 21st June –Planning and group agreement

On 25th June –Completion of Individual pages

On 29th June – Completion of Shared pages

From June 29th to July 3rd - Reviewing the works and finish Individual Task (Report).

Communication Plan

Decide and document how your group will communicate with each other and collaborate on a regular basis during the project. This must be in your group Discord Channel but decide: How often and how will you communicate? What are your expectations on others responding to your communications?

We will communicate and share files over Discord, maybe text message each other if we need to.

We will meet in-person during class and have an online meeting on Discord or meet whenever needed.

We will try to respond to each other's communications within 24 hours.

On-track behaviours

What behaviours will result in great group outcomes?

- *Be polite to and respect other group members*
- *Make communications clear.*
- *Review each other's works*
- *Help the ones struggling*

- Keeping the group continuously updated on progress, especially before modifying shared design documents or project code.

Off-track behaviours

What behaviours would result in group outcomes that aren't great?

- *Being disrespectful to other group members*
- *Unclear communication*
- *No proper contribution to the team*
- *Failing to communicate delays, missing syncs without notice, or routinely ignoring group messages*

Resolving tensions

How will we resolve tensions/off track behaviour as a group?

Communicate the issue calmly among all the team members and make an appropriate decision.

If the tension cannot be resolved internally after a good effort, agree as a group to consult your instructor for mediation.

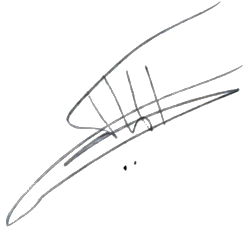

Team Expectations:

1. Keep the team proactively updated on task progress, potential delays, and document updates, while responding to group messages in a timely manner.
2. Divide the overall workload fairly, ensuring every team member actively contributes to both the technical execution and the final reporting phases.
3. We must complete our sections of the task on time.
4. Add appropriate comments on the code so that other members can understand it
5. Be respectful to each other
